25X1

Comment. In November 1954, the volume of ~~flu~~auxite supply shipments (5,824 tons) dropped considerably compared to 27,491 tons in October and 49,100 tons in August 1954. Since only the Lauter Werk at Schwarzkollm has been mentioned in November, while Graefenhainichen and Greiz-Doehlan also received large ~~flu~~auxite shipments during the previous months, the report probably is incomplete. It may also be possible, however, that the decrease followed a premature fulfillment of the annual delivery quota.
